

Move
patients'
lives forward.
**Keep
their smiles
in place.**

Vivera® retainers deliver
superior retention the
easy way.

vivera® retainers

Better material. **Better retention.**

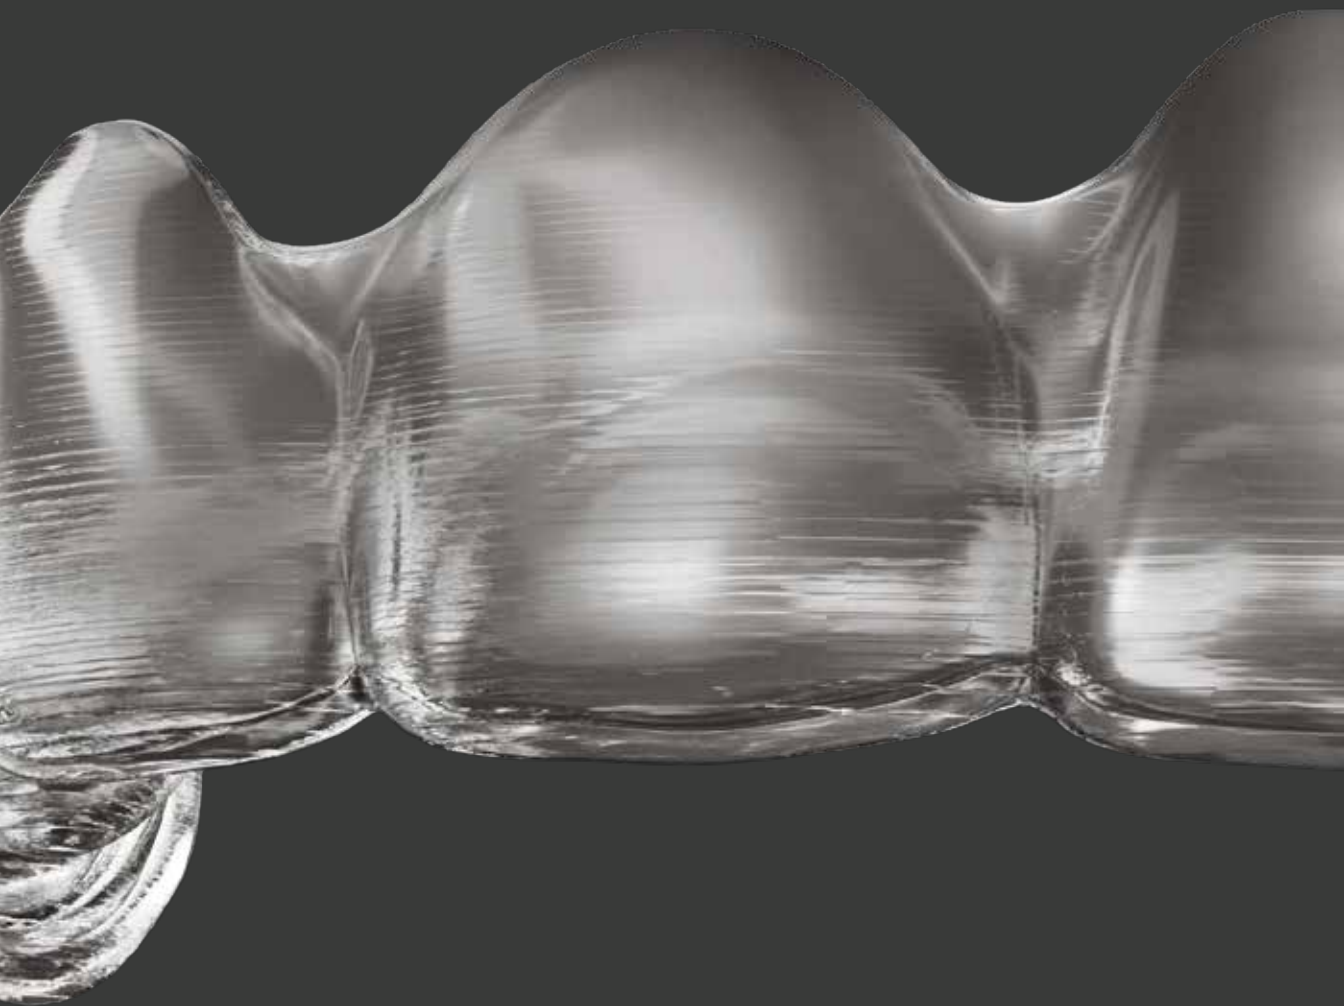

Materials matter, and ours are specifically made to hold teeth in place so patients can maintain the smiles they love. And you can rest assured their teeth won't move back.*

- Thermoplastic specifically designed for strength.
- 30% stronger to help maintain teeth in the desired position.**
- Self-corrects relapses up to 0.25 mm per tooth.

*Teeth staying in position is dependent on wear according to doctor recommendations and patient compliance.

**When compared to materials used in other clear retainers.

Smiles won't last without **lasting retention.**

Many leading clear retainers begin to deform in as little as two months.* But Vivera retainers are made to last, so your patients' teeth stay exactly where they should while their lives move forward.*

- Twice as durable as other leading clear retainers.**
- Lower risk of cracking or breaking.**
- Multiple sets mean there's always a backup, so your patients stay in working retention.

*Teeth staying in position is dependent on wear according to doctor recommendations and patient compliance.

**Data on file at Align Technology, Inc.

A comfortable fit means a higher likelihood of **compliance.**

Vivera retainers are produced by the makers of Invisalign® clear aligners, the world's largest user of state-of-the-art 3D printing technology making highly accurate, well-fitting retainers that are easily inserted and fit more comfortably.* A comfortable clear retainer means patients are more likely to wear it – preventing relapses.

Give your patients
the **most advanced**
technology from
beginning to end.

Straightening through retention, Invisalign® clear aligners and Vivera retainers team up to offer state-of-the-art technology, a premium patient experience, and a lasting smile.

No hassles. No headaches. **No relapses.***

With a busy practice, there's no time for interruptions. You'll benefit from our commitment to excellence.

Produced by the makers of Invisalign clear aligners, the world's largest user of state-of-the-art 3D printing technology, for a highly accurate custom fit – reducing the risk of relapse.*

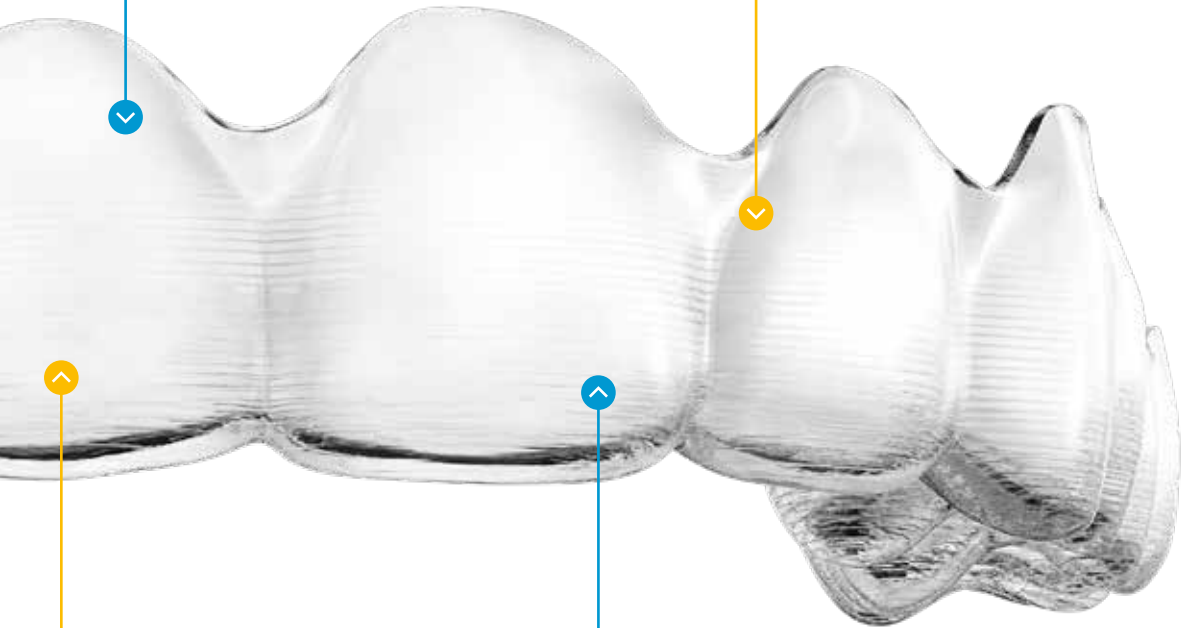

*Teeth staying in position is dependent on wear according to doctor recommendations and patient compliance.

**When compared to materials used in other clear retainers. Data on file at Align Technology, Inc.

Vivera retainers material is 30% stronger than other clear retainer material** to help maintain teeth in the desired position.*

Materials used in Vivera retainers are twice as durable as materials used in other clear retainers and have a lower risk of cracking and breaking.**

Vivera retainers are the first retainers in the market that can be customized with precision bite ramps to provide additional support after a deep bite correction – for better efficiency and performance.

Multiple sets ensure there's always a backup. Plus, each smile is digitally stored, so getting replacements is easy.
